### Contents

- 1. Introduction & scope
- 2. Test approach, roles, environments, data, criteria
- 3. Feature map (every feature found in the source code)
- 4. Code-review findings to verify on the live site
- 5. Role & jurisdiction access matrix
- 6. Detailed test cases (per module)
- 7. Release smoke-test checklist
- 8. Execution summary
- 9. Defect log
- 10. Test-cycle sign-off

# 1. Introduction

## 1.1 Purpose

This plan defines how to manually verify every feature of Sufi Support Hub as deployed to <https://sufisupporthub.com>. It was written from the application source code ([github.com/musty131311/sufi-support-hub](https://github.com/musty131311/sufi-support-hub), a Laravel 12 app), so every page, form, role and workflow in the code has test cases. It is cumulative: run the full plan for a major release, run the smoke checklist (Section 7) on every deployment, and add new cases in the blank rows whenever a feature is added.

## 1.2 System overview

- **Public website:** homepage, “Join the Movement” registration, Join a Chapter, poster generator, news, leadership/team, sitemap.
- **Admin panel (/admin):** a 5-level hierarchy (National → State → Zonal → LGA → Cluster), each seeing only its own jurisdiction. It covers signups, members and promotion, admins, polling agents, parties, elections and candidates, news, team, result review, the live situation room, trash and the activity log.
- **Polling-agent portal (/agent):** a separate login. Agents report election results and upload scoresheets for their assigned polling units.

## 1.3 Scope

**In scope:** all of the above, plus hosting/HTTPS, security headers, performance, mobile/browser compatibility, accessibility, SEO and deployment/backup checks.

**Out of scope:** automated PHPUnit tests (already run by CI on every deploy), load testing beyond the manual spot-checks here, and third-party sites (govote.ng, social networks).

# 2. Test Approach

## 2.1 Test types

- **Smoke:** about 20-minute critical-path check after every deployment (Section 7).
- **Functional:** positive, negative and boundary cases per module (Section 6).
- **Role & jurisdiction:** the same URLs tried with every role (Section 5 + module RB).
- **Election-day rehearsal:** agents submit and admins review simultaneously (modules RS, RV, SR, PF).
- **Non-functional:** security, performance, compatibility, accessibility, SEO.
- **Regression:** all High-priority cases, plus every module touched by the release.

## 2.2 Test accounts needed

| Role            | What it can do                                                     | Login URL    | Test account (fill in) |
|-----------------|--------------------------------------------------------------------|--------------|------------------------|
| Visitor         | Public pages, registration, chapter join, poster                   | —            | n/a                    |
| National admin  | Everything, including national content, activity log and all trash | /admin/login |                        |
| State admin     | One state: members, admins below, agents, results                  | /admin/login |                        |
| Zonal admin     | One senatorial zone within a state                                 | /admin/login |                        |
| LGA admin       | One LGA                                                            | /admin/login |                        |
| Cluster admin   | Hand-picked polling units only                                     | /admin/login |                        |
| Polling agent   | Report results for own assigned units                              | /agent/login |                        |
| 2nd-state admin | For cross-jurisdiction (negative) checks                           | /admin/login |                        |

## 2.3 Test environments

| Platform              | Browsers / devices             | Done                     |
|-----------------------|--------------------------------|--------------------------|
| Desktop Windows 10/11 | Chrome, Edge, Firefox (latest) | <input type="checkbox"/> |
| Desktop macOS         | Safari, Chrome (latest)        | <input type="checkbox"/> |

| Platform      | Browsers / devices                                                              | Done                     |
|---------------|---------------------------------------------------------------------------------|--------------------------|
| Android phone | Chrome on a low/mid-range device, on a slow 3G/4G network (agents in the field) | <input type="checkbox"/> |
| iPhone        | Safari (latest iOS and one version back)                                        | <input type="checkbox"/> |
| Tablet        | iPad or Android tablet, portrait and landscape                                  | <input type="checkbox"/> |
| Large screen  | 1920 px / TV or projector for the situation room                                | <input type="checkbox"/> |

## 2.4 Test data

- Use email aliases you can read (e.g. name+ssh01@gmail.com). Prefix every test name with “TEST”.
- Never use real members’ personal data. Delete test records after the cycle (module OP).
- Have ready: a JPG/PNG portrait photo, a PDF scoresheet, a file over 10 MB, a file over 2 MB, a GIF, a .php file renamed to .jpg, text of 300+ characters, emoji and Hausa/Arabic text, and `<script>alert(1)</script>`.
- Pick one test state (e.g. Kano) with a Zonal, LGA and Cluster chain, plus a second state for negative checks.
- Result submission tests need at least one ACTIVE election with ACTIVE candidates for the test unit.
- If testing on production, agree a window, then flag/remove test results so they never affect real totals.

## 2.5 Entry & exit criteria

**Entry:** build deployed and GitHub Actions green, site reachable, all test accounts ready.

**Exit:** 100% of H cases executed; no open Critical/High defects; at least 95% of executed cases passed; remaining issues accepted in the sign-off (Section 10).

## 2.6 Severity definitions

| Severity | Meaning                                                          | Example in this app                                                                          |
|----------|------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| Critical | Data breach, wrong election totals, site down, or no workaround. | A State admin sees another state’s results, or party totals are wrong in the situation room. |
| High     | Core feature broken.                                             | Agent cannot submit results. Registration fails.                                             |
| Medium   | Feature partly works, workaround exists.                         | A filter on Members is ignored.                                                              |
| Low      | Cosmetic or text issue.                                          | Typo, misaligned icon, dead footer link.                                                     |

Test case priority: **H** = must pass for release; **M** = should pass; **L** = nice to have.

## 2.7 How to execute

- Follow the steps exactly and compare with the expected result.
- Tick ☐ Pass, ☐ Fail or ☐ N/A. Never leave a row blank.
- On failure, log it in Section 9 and write the Defect ID in the Notes column. Attach a screenshot or screen recording.
- Rows marked NOTE describe behaviour seen in the code that may be unintended. Confirm with the product owner.

### 3. Feature Map (from the source code)

Every user-facing feature found in the repository, with where it lives and who uses it. Tick “Covered” once its module has been fully executed in this cycle.

| Covered                  | Feature                                                                                                                       | URL / route                                          | Who                          | Module |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|------------------------------|--------|
| <input type="checkbox"/> | HTTPS redirect, canonical domain, error pages                                                                                 | sufisupporthub.com                                   | All                          | HO     |
| <input type="checkbox"/> | Homepage: hero, pillars, policy focus, leadership, latest news, join section, footer                                          | /                                                    | Visitor                      | HP     |
| <input type="checkbox"/> | Policy search box (added by script) and “Across Nigeria” zone cards                                                           | /                                                    | Visitor                      | HP     |
| <input type="checkbox"/> | 2-step registration modal: name/email/phone, then state/LGA/ward/PU + involvement                                             | / (modal) → POST /register                           | Visitor                      | RG     |
| <input type="checkbox"/> | Location lookup APIs                                                                                                          | /locations/{state}/lgas, /{lga}/wards, /{ward}/units | Visitor                      | LC     |
| <input type="checkbox"/> | Join a Chapter form                                                                                                           | /join-chapter → POST /join-chapter                   | Visitor                      | CH     |
| <input type="checkbox"/> | Personalised campaign poster: upload photo, zoom/drag, add name, download PNG                                                 | /poster                                              | Visitor                      | PO     |
| <input type="checkbox"/> | News list (12 per page) and article page with share buttons                                                                   | /news, /news/{slug}                                  | Visitor                      | NW     |
| <input type="checkbox"/> | Team list (12 per page) with photos and social links                                                                          | /team                                                | Visitor                      | TM     |
| <input type="checkbox"/> | sitemap.xml, canonical, Open Graph/Twitter cards, JSON-LD                                                                     | /sitemap.xml                                         | Search engines               | SE     |
| <input type="checkbox"/> | Admin login/logout, lockout, forced first-login password change                                                               | /admin/login, /admin/password/change                 | All admins                   | AL     |
| <input type="checkbox"/> | Dashboard counts and sidebar navigation                                                                                       | /admin                                               | All admins                   | AD     |
| <input type="checkbox"/> | Signups list with Registrations / Chapter Members tabs (20 per page)                                                          | /admin/signups?type=...                              | All admins (scoped)          | SU     |
| <input type="checkbox"/> | Team CRUD with photo (crop 500×500), social handles, sort order, active flag                                                  | /admin/team                                          | National                     | AT     |
| <input type="checkbox"/> | News CRUD with image (crop 800×450), publish date, active flag, auto slug                                                     | /admin/news                                          | National                     | AN     |
| <input type="checkbox"/> | Party CRUD: name, abbreviation, colour, logo, sort order, active                                                              | /admin/parties                                       | National                     | PA     |
| <input type="checkbox"/> | Elections list/edit (name, date, open/closed)                                                                                 | /admin/elections                                     | National                     | EL     |
| <input type="checkbox"/> | Candidates per election and scope (state / zone / constituency), with photo                                                   | /admin/elections/{id}/candidates                     | National                     | EL     |
| <input type="checkbox"/> | Members list with search and filters                                                                                          | /admin/members                                       | All admins (scoped)          | ME     |
| <input type="checkbox"/> | Promote a member to State/Zonal/LGA/Cluster admin or Agent                                                                    | /admin/members/{type}/{id}/promote                   | All admins (below own level) | ME     |
| <input type="checkbox"/> | Bulk-promote up to 100 members to Agent (auto passwords)                                                                      | /admin/members/bulk-promote-agents                   | All admins (scoped)          | ME     |
| <input type="checkbox"/> | Admins list (downline only), edit scope/active, assign units to Cluster, remove                                               | /admin/admins                                        | National, State, Zonal, LGA  | AM     |
| <input type="checkbox"/> | Agents list, edit (name/email/phone/password/active), assign/unassign units, remove                                           | /admin/polling-agents                                | All admins (scoped)          | AG     |
| <input type="checkbox"/> | Agent login/logout, forced password change, dashboard of assigned units                                                       | /agent/login, /agent                                 | Agent                        | AP     |
| <input type="checkbox"/> | Multi-election report form: voters, votes per party/candidate, scoresheet upload, draft autosave                              | /agent/units/{unit}/report                           | Agent                        | RS     |
| <input type="checkbox"/> | Agent views own scoresheet                                                                                                    | /agent/results/{id}/scoresheet                       | Agent                        | RS     |
| <input type="checkbox"/> | Results queue by election and status (pending/verified/flagged/all)                                                           | /admin/polling-results                               | All admins (scoped)          | RV     |

## 4. Code-Review Findings to Verify

These came up while reading the source code for this plan. Each one also appears as a test case marked NOTE. Confirm on the live site, then record the decision.

| #  | Module | Finding                                                                                                                                                                                                              | Confirmed?                                                  | Decision / Defect ID |
|----|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|----------------------|
| 1  | HP     | Homepage nav “About” and “Contact”, and footer “About Us”, “Events”, “Volunteer” and “Support Us” link to #about, #contact, #events, #volunteer and #donate. None of these sections exist, so the clicks do nothing. | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 2  | HP     | Footer social icons all point to “#” (marked TODO in the code).                                                                                                                                                      | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 3  | HP     | Footer “Privacy Policy   Terms of Service” are plain text with no pages, although personal data (name, email, phone, polling unit) is collected.                                                                     | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 4  | HP     | The “Across Nigeria” zone cards show hard-coded chapter counts and only pop up an alert when clicked.                                                                                                                | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 5  | HP     | The footer contact is support@innofiniti.ng / +234 706 779 7009. Confirm these are the intended SSH contacts.                                                                                                        | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 6  | CH     | /join-chapter does not display validation errors, so a rejected submission (e.g. mismatched polling unit) reloads with no message.                                                                                   | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 7  | CH     | The success text promises contact “via email”, but no email is sent (the mail call is commented out).                                                                                                                | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 8  | RG/CH  | README says resubmitting with the same email updates the details. The code keeps the original record unchanged and still shows success.                                                                              | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 9  | AD     | Dashboard counts are national totals for every admin role (not filtered by jurisdiction).                                                                                                                            | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 10 | AD     | Team, News, Parties and Elections sidebar links are shown to all admin roles but return 403 for non-National admins.                                                                                                 | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 11 | PF     | The admin Members page loads all matching members without pagination, so it may slow down as signups grow.                                                                                                           | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 12 | TR/LG  | Trash restore/permanent delete and News/Team changes are not written to the Activity Log.                                                                                                                            | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |
| 13 | HO     | robots.txt does not reference /sitemap.xml. logo.png is noted in the README as a placeholder.                                                                                                                        | <input type="checkbox"/> Yes<br><input type="checkbox"/> No |                      |

## 5. Role & Jurisdiction Access Matrix

Open each URL directly in the address bar while logged in as each role. Write ✓ when the actual result matches the expected one, ✗ when it does not.

**Key:** A = allowed · own = allowed, but shows only that role's own jurisdiction · own\* = own admins/agents only, no content types · empty = page opens but list is empty · 403 = Forbidden · L = redirected to the login page for that area.

| URL                                      | Visitor                       | Agent                           | Cluster                           | LGA                              | Zonal                            | State                            | National                      |

We will contact you shortly via email."                                                                       | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-03 | Admin > Signups > Chapter Members.                                               | New record present with the correct details.                                                                                                                                | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-04 | Check the tester's inbox after joining.                                          | NOTE: the code does not send any email (the mail line is commented out), yet the message promises email contact. Log the gap unless the owner confirms follow-up is manual. | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-05 | Submit with the same email again (different details).                            | Success is shown, there is no duplicate, and the original details are unchanged.                                                                                            | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-06 | Tamper the polling-unit value (DevTools) and submit.                             | Must be rejected. NOTE: this page has no error display in the code, so check whether ANY error message is shown. A silent reload with no message is a defect.               | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-07 | Submit with required fields removed (DevTools: remove the "required" attribute). | Nothing saved and a clear error shown (see previous note).                                                                                                                  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-08 | After a failed submission, check the fields.                                     | Name, email and phone keep the typed values (old input).                                                                                                                    | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-09 | Submit more than 5 times in 1 minute.                                            | The 6th is rejected with 429 "Too Many Requests".                                                                                                                           | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-10 | Complete the form on a phone.                                                    | Layout fits the screen and all dropdowns are usable.                                                                                                                        | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-11 |                                                                                  |                                                                                                                                                                             |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CH-12 |                                                                                  |                                                                                                                                                                             |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## PO. Poster Generator (/poster)

Preconditions: Have a portrait photo (JPG, 1–5 MB), a PNG with transparency and a non-image file ready.

| ID    | Test scenario & steps                              | Expected result                                                                                                                  | Pri | Result                                                                                         | Notes / Defect ID |
|-------|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| PO-01 | Open /poster.                                      | Page shows the name field (max 50 characters), photo upload and a disabled Generate button.                                      | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-02 | Enter a name only.                                 | Generate stays disabled until a photo is also chosen.                                                                            | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-03 | Upload a photo.                                    | Preview and edit canvas appear with the poster background and the photo in the circle.                                           | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-04 | Use Zoom In, Zoom Out, drag the photo, then Reset. | Photo scales and moves inside the circle. Reset restores the default fit.                                                        | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-05 | Enter the name and click Generate.                 | Poster renders at 800×800 with the photo in the circle and the NAME IN CAPITALS in the correct place. The success message shows. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

| ID    | Test scenario & steps                                                       | Expected result                                                                                                                               | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| PO-06 | Click Download.                                                             | Downloads "<Name_With_Underscores>_SufiSupportHub_Poster.png", which opens correctly and matches the preview.                                 | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-07 | Try a 51-character name, and a name with emoji and Arabic/Hausa characters. | Input stops at 50 characters. Text renders without boxes and does not overflow the poster.                                                    | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-08 | Upload a non-image file (e.g. .pdf, or .exe renamed to .jpg).               | The file is ignored or refused gracefully. The page does not break.                                                                           | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-09 | Upload a very large photo (15–20 MB, 6000 px).                              | Works, or fails gracefully without freezing the tab.                                                                                          | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-10 | Full flow on an iPhone (Safari) and an Android phone (Chrome).              | Upload from camera and gallery works, drag works by touch, and the download saves to the phone (iOS may open the image in a new tab to save). | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-11 | Privacy check: watch the Network tab during the whole flow.                 | The photo is NOT uploaded to the server. All processing happens in the browser.                                                               | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-12 |                                                                             |                                                                                                                                               |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PO-13 |                                                                             |                                                                                                                                               |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## NW. Public News (/news, /news/{slug})

Preconditions: At least 13 active news items (to test pagination), plus 1 inactive item.

| ID    | Test scenario & steps                                                  | Expected result                                                                               | Pri | Result                                                                                         | Notes / Defect ID |
|-------|------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| NW-01 | Open /news.                                                            | Shows ACTIVE items only, newest published first, 12 per page, with image, date and title.     | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-02 | Use the pagination links («, page numbers, »).                         | Correct pages load. The URL shows ?page=N. Nothing is missing or repeated across pages.       | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-03 | Open an article.                                                       | Title, date, hero image and full body show. Line breaks are preserved. "Back" goes to /#news. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-04 | Open the URL of an INACTIVE (unpublished) item, and of a deleted item. | 404 page.                                                                                     | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-05 | Click the Facebook, X and WhatsApp share buttons.                      | Each opens a share window pre-filled with the article URL (and title for X/WhatsApp).         | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-06 | Article whose body contains <b>, <script> or a link.                   | Shows as literal text (escaped). Nothing executes.                                            | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-07 | Article with no image.                                                 | Page still looks right, with no broken image icon.                                            | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| NW-08 | Two articles with the same title.                                      | Each gets a unique slug/URL and both open correctly.                                          | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## AG. Admin - Polling Agents

Preconditions: Agents exist, some covering units in more than one LGA.

| ID    | Test scenario & steps                                       | Expected result                                                                                          | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| AG-01 | Open Polling Agents as National, then as State and Cluster. | Each sees only agents in their jurisdiction, with a unit count.                                          | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-02 | Edit an agent: change name, phone and email.                | "Agent updated." Log records before/after.                                                               | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-03 | Change email to one already used by another agent.          | Validation error (unique).                                                                               | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-04 | Set a new password for the agent.                           | Agent must change it at next login. The log shows password_changed = true and never the password itself. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-05 | Untick Active.                                              | Agent is blocked on their next request (403 deactivated) and can't log in.                               | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-06 | Assign a unit by searching state → LGA → ward.              | Only units in your jurisdiction are listed. Unit added.                                                  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-07 | Unassign a unit.                                            | Unit removed. The agent can no longer open or report it (403).                                           | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

| ID    | Test scenario & steps                                                                             | Expected result                                                           | Pri | Result                                                                                         | Notes / Defect ID |
|-------|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| AG-08 | Agent covers units in LGA-A and LGA-B. LGA-A admin tries to edit, deactivate or delete the agent. | 403. Account-level control needs authority over ALL of the agent's units. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AG-09 | Remove an agent.                                                                                  | Soft-deleted to Trash. ## RV. Admin - Result Review (verify / flag / history)

Preconditions: Pending results exist: one clean, one with an anomaly, one resubmitted twice.

| ID    | Test scenario & steps                                                               | Expected result                                                                                                   | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| RV-01 | Open Result Review. Switch the election tabs and the status tabs.                   | Lists filter correctly, newest submitted first, only units in your jurisdiction.                                  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-02 | Click the scoresheet link in the list.                                              | Opens the current scoresheet in a new tab (image or PDF).                                                         | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-03 | Open "Review & history" for a clean result.                                         | Shows the counts, party votes, current version scoresheet, earlier submissions and audit log.                     | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-04 | Verify a clean result.                                                              | "Review recorded." Status becomes Verified, with verifier and time recorded. It now counts in the situation room. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-05 | Verify an ANOMALY result with no reason, or a reason under 10 characters.           | Error: must explain why (at least 10 characters).                                                                 | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-06 | Verify the anomaly result with a 10+ character reason.                              | Verified. The note is saved and visible in the log.                                                               | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-07 | Flag a result (with or without a reason).                                           | Status becomes Flagged. It is excluded from the totals.                                                           | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-08 | Open the same result in 2 tabs and verify in both.                                  | The second gets 409 "This result has changed..."                                                                  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-09 | Agent resubmits after verification.                                                 | Status goes back to Pending. The old verified figures stop counting. A new version appears in history.            | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-10 | Open each older version's scoresheet from history.                                  | The correct historical file opens for each version.                                                               | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-11 | State admin opens a result from another state by URL, including its scoresheet URL. | 403.                                                                                                              | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-12 | Change the submission id in the scoresheet URL to one from another result.          | 404.                                                                                                              | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-13 |                                                                                     |                                                                                                                   |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RV-14 |                                                                                     |                                                                                                                   |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## SR. Situation Room (live dashboard)

Preconditions: Verified, pending and flagged results in at least 2 states and 2 elections.

| ID    | Test scenario & steps                                            | Expected result                                                                     | Pri | Result                                                                                         | Notes / Defect ID |
|-------|------------------------------------------------------------------|-------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| SR-01 | Open the Situation Room. Use the election switcher.              | The page reloads for the chosen election. It defaults to the first ACTIVE election. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| SR-02 | Progress: compare with the Result Review counts.                 | Assigned units, reported, verified, flagged and pending all match.                  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## LG. Activity Log (National only)

Preconditions: Some actions performed by different admins.

| ID    | Test scenario & steps                                                                                  | Expected result                                                                    | Pri | Result                                                                                         | Notes / Defect ID |
|-------|--------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| LG-01 | Open the Activity Log.                                                                                 | Newest first, 20 per page, showing actor, action, subject and time.                | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-02 | Filter by actor name (partial), by action, and by date range.                                          | Results filter correctly. Filters stay applied across pages.                       | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-03 | Check which actions are logged: party, candidate, election, admin, agent and member-promotion changes. | Each shows the correct actor and before/after details. Passwords are never shown.  | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-04 | Try to edit or delete a log entry (there should be no UI or route for it).                             | Not possible. The log is append-only.                                              | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-05 | Non-National admin opens /admin/activity-log.                                                          | 403. Link not shown in the sidebar.                                                | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-06 | Create/edit/delete News and Team, then check the log.                                                  | NOTE: the code does not log News/Team changes. Confirm whether they need auditing. | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-07 |                                                                                                        |                                                                                    |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| LG-08 |                                                                                                        |                                                                                    |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## RB. Role & Jurisdiction Access (also fill in the Section 6 matrix)

Preconditions: One account per role: National; State (Kano); Zonal (a Kano zone); LGA (a Kano LGA); Cluster (3 Kano units); Agent (1 unit); and a second State (Lagos) for cross-checks.

| ID    | Test scenario & steps                                                                                 | Expected result                                                        | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| RB-01 | For every role, try each admin URL from the Section 6 matrix directly in the address bar.             | Every cell matches the expected Allow/403/Login result.                | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-02 | Kano State admin: Members, Signups, Agents, Results, Situation Room.                                  | Kano data only. Nothing from Lagos anywhere.                           | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-03 | Kano State admin: open a Lagos member's promote URL, a Lagos agent's edit URL and a Lagos result URL. | 403 on each.                                                           | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-04 | Cluster admin: only their 3 assigned units' members, agents and results.                              | Nothing from other units in the same LGA.                              | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-05 | Agent: guess another unit's report URL (/agent/units/{id}/report).                                    | 403.                                                                   | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-06 | Deactivate a State admin who has a downline.                                                          | Downline admins and agents are unaffected. The State admin is blocked. | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-07 |                                                                                                       |                                                                        |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| RB-08 |                                                                                                       |                                                                        |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## SC. Security (manual checks)

Preconditions: Use browser DevTools. Optional: securityheaders.com and SSL Labs.

| ID    | Test scenario & steps                                                                                                                               | Expected result                                                                                                                                                         | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| SC-01 | Run https://sufisupporthub.com through securityheaders.com.                                                                                         | Strict-Transport-Security, X-Frame-Options SAMEORIGIN, X-Content-Type-Options nosniff, Referrer-Policy, Permissions-Policy and Content-Security-Policy are all present. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## PF. Performance

Preconditions: Use Chrome DevTools Lighthouse (mobile) and PageSpeed Insights.

| ID    | Test scenario & steps                                     | Expected result                                                                   | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-----------------------------------------------------------|-----------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| PF-01 | Lighthouse mobile on /, /news, /join-chapter and /poster. | Performance ≥ 70, LCP < 2.5 s, CLS < 0.1. Record the scores each release.         | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-02 | Homepage hero and news images.                            | Images are compressed and sized sensibly (the hero PNG should not be several MB). | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-03 | Location dropdowns for a large state (e.g. Kano, Lagos).  | Unit list loads in under 2 s.                                                     | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

| ID    | Test scenario & steps                                                   | Expected result                                                                                                    | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| PF-04 | Situation room with realistic data (e.g. 5,000+ verified results).      | Page and /summary respond in under 3 s. The 20 s refresh does not overload the server.                             | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-05 | Members page as National with a large number of registrations.          | Loads in an acceptable time (NOTE: this list is not paginated in the code, so watch for slowness as signups grow). | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-06 | Election-day simulation: 10-20 testers submit results at the same time. | All submissions succeed or get clear errors. No timeouts or lost scoresheets.                                      | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-07 |                                                                         |                                                                                                                    |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| PF-08 |                                                                         |                                                                                                                    |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## CB. Browsers, Devices & Responsive Layout

Preconditions: See the environment table in Section 2.3.

| ID    | Test scenario & steps                                                                | Expected result                                               | Pri | Result                                                                                         | Notes / Defect ID |
|-------|--------------------------------------------------------------------------------------|---------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| CB-01 | Run the smoke checklist (Section 7) in Chrome, Edge, Firefox and Safari on desktop.  | Same behaviour and layout in all four.                        | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-02 | Public pages at 320, 375, 414, 768, 1024, 1366 and 1920 px widths.                   | No horizontal scrolling, overlapping text or cut-off buttons. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-03 | Agent portal and result form on Android Chrome and iPhone Safari.                    | Fully usable with a numeric keypad for number fields.         | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-04 | Admin panel on a tablet.                                                             | Usable. Tables scroll.                                        | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-05 | Rotate the phone between portrait and landscape on the modal, poster and agent form. | Layout adapts. No data lost.                                  | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-06 |                                                                                      |                                                               |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| CB-07 |                                                                                      |                                                               |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## AX. Accessibility

Preconditions: Use Lighthouse Accessibility and keyboard-only navigation.

| ID    | Test scenario & steps                                                        | Expected result                                                                             | Pri | Result                                                                                         | Notes / Defect ID |
|-------|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| AX-01 | Lighthouse Accessibility on the public pages.                                | Score $\geq$ 85. Record the issues.                                                         | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AX-02 | Keyboard only: Tab through the homepage, open the modal, fill it and submit. | Focus is visible and in a logical order. The modal can be closed with Esc or X by keyboard. | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AX-03 | All images have meaningful alt text (hero, team photos, news images).        | Alt text present.                                                                           | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AX-04 | Form fields have labels. Errors are announced or visible next to the field.  | Labels present. Errors are clear.                                                           | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| AX-05 | Colour contrast of green text and buttons.                                   | Meets WCAG AA (4.5:1 for normal text).                                                      | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

| ID    | Test scenario & steps | Expected result | Pri | Result                                                                                         | Notes / Defect ID |

## OP. Deployment, Data & Operations

Preconditions: Coordinate with whoever manages the cPanel hosting and the GitHub repository.

| ID    | Test scenario & steps                                                                                                       | Expected result                                                                                   | Pri | Result                                                                                         | Notes / Defect ID |
|-------|-----------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------|-------------------|
| OP-01 | Push a harmless change to the production branch.                                                                            | GitHub Actions run passes: tests → build → FTP upload → deploy hook HTTP 200. The change is live. | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-02 | After deploy, check that storage/app/private scoresheets, uploads (news/team/party/candidate images) and sessions survived. | Nothing is lost or overwritten by the deploy.                                                     | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-03 | Pending migrations after deploy.                                                                                            | They ran automatically. No 500 errors on pages that use new columns.                              | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-04 | Polling-unit data: count the states, LGAs and units in the database vs the CSV.                                             | Counts match (176k+ units). No duplicates after re-running the seeder.                            | M   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-05 | Backups: confirm that database AND storage/app/private backups exist and a restore has been tried.                          | Backup is recent, and a restore on staging works.                                                 | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-06 | Admin seed: check that ADMIN_EMAIL/ADMIN_PASSWORD exist and the default admin password has been changed.                    | No default or weak credentials in production.                                                     | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-07 | Mail configuration.                                                                                                         | MAIL_MAILER is not “log” in production, if any feature sends email in future.                     | L   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-08 | Clean-up after testing: remove test registrations, agents, results and news.                                                | Production data contains no test records (or they are clearly labelled and excluded from totals). | H   | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-09 |                                                                                                                             |                                                                                                   |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |
| OP-10 |                                                                                                                             |                                                                                                   |     | <input type="checkbox"/> Pass<br><input type="checkbox"/> Fail<br><input type="checkbox"/> N/A |                   |

## 7. Release Smoke-Test Checklist (every deployment)

Target: under 20 minutes. Any failure blocks the release until triaged.

| #  | Check                                                                                           | Pass                     | Fail                     | Notes |
|----|-------------------------------------------------------------------------------------------------|--------------------------|--------------------------|-------|
| 1  | https://sufisupporthub.com loads (http redirects to https). No console errors or broken images. | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 2  | Top nav, “View All News”, “View Full Team” and the /join-chapter and /poster links all open.    | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 3  | Homepage modal: register a TEST user (state → LGA → ward → unit cascade works). Success shown.  | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 4  | /join-chapter: submit a TEST member. Green success message.                                     | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 5  | /poster: upload a photo, add a name, generate and download a PNG.                               | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 6  | /news and one article open. /team opens. /sitemap.xml is valid.                                 | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 7  | Admin login (National) works. The dashboard counts are sensible.                                | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 8  | Admin > Signups shows the TEST registration and chapter member just created.                    | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 9  | Admin > News: create an inactive TEST item, then delete it (moves to Trash).                    | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 10 | Admin > Result Review and Situation Room open for the active election with no errors.           | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 11 | State admin login shows only their state’s data (spot-check Members and Results).               | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 12 | Non-National admin gets 403 on /admin/news.                                                     | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 13 | Agent login works and the dashboard lists only the assigned units.                              | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 14 | Agent report form opens for an assigned unit (submit only in an agreed test window/unit).       | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 15 | Agent gets 403 on another unit’s report URL.                                                    | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 16 | Logout works for both admin and agent.                                                          | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 17 | /.env, /composer.json and /deploy-hook.php (without the token) are NOT readable.                | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 18 | Security headers are present (DevTools → Network → response headers).                           | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 19 | Homepage, modal, agent portal and situation room checked on one Android phone and one iPhone.   | <input type="checkbox"/> | <input type="checkbox"/> |       |
| 20 | Test records created during the smoke test have been removed or flagged.                        | <input type="checkbox"/> | <input type="checkbox"/> |       |

## 8. Execution Summary

Fill in at the end of each test cycle.

| Module       | Title                                                          | Cases      | H          | Pass | Fail | N/A | Tester |
|--------------|----------------------------------------------------------------|------------|------------|------|------|-----|--------|
| HO           | Hosting, Domain, HTTPS & Error Pages                           | 12         | 7          |      |      |     |        |

## 9. Defect Log

One row per failure. Keep screenshots/videos in a shared folder named by Defect ID.

[illegible]

**Status:** New → In progress → Fixed → Retest passed / Reopened → Closed. **Every report needs:** URL, role/account, exact steps, expected vs actual, screenshot, date/time, browser and device.

## 10. Test-Cycle Sign-off

|                                                      |             |
|------------------------------------------------------|-------------|
